**THE SALINE PROCESS:** The purpose of the Saline Process training is to equip healthcare workers to be witnesses for Christ in their clinical settings. The Biblically based teaching is relevant to different cultures and healthcare settings. Participants learn eight tools that can be put into practice with their patients and colleagues. After completing the Saline Process, participants should be able to assess a patient's attitude toward Christ and know how to respond appropriately, applying the ethical principles of permission, sensitivity and respect. Ultimately, the Saline Process training prepares healthcare workers to be part of the Lord's work in our world so our Father in heaven is glorified.
